- One of two industries truly diversified.
- Minerals leadership:
 - Worldwide: Silica; HPQ; Clay; Nepheline y Olivine
 - Regionally: Frac-sand; lime and limestone; Calcium Carbonate and others.
- Long-term business growth perspective and value creation through diversification.
- Strong financial position.

Our Vision 2020

Our Vision 2020

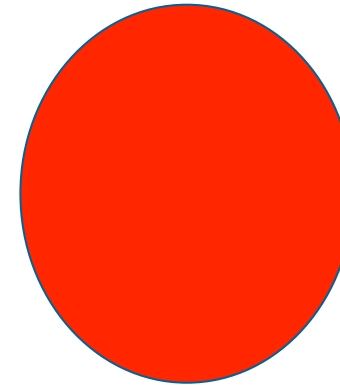

What does our purpose mean day to day

Material Solutions

Transforming raw materials with technology and know-how.
Offering solutions with and beyond minerals.

for Sibelco this means:

- gaining intimate knowledge of our customers, their needs and processes - understanding our customers like nobody else
- moving to proactive partnerships in which we propose solutions
- forming industry alliances
- being reliable and consistent
- hiring the technical talent to ensure we lead
- going beyond customer expectations
- expanding our core business beyond minerals
- researching and identifying new technologies and solutions

Advancing Life

Meeting the needs of a growing population; new technologies / doing more with less; supporting the progress of modern life today and tomorrow. Providing a firm and genuine commitment to the environment and all stakeholders.

for Sibelco this means:

- looking beyond the horizon
- working with our customers (and their customers) to anticipate future direction & needs
- growing our portfolio in line with our insights and forward vision
- taking 'whole of life' responsibility for our operations
- developing our solutions portfolio and reserves for the long-term
- commit to and support our local community and stakeholders
- caring for our people – keeping them healthy and safe
- becoming the 'neighbour of choice' for local communities

Sustainable Development Goals

Sustainable Development Goals

Sibelco Initiatives

- Going for Zero Program
 - Reduce incidents at all levels

Sibelco Initiatives

- Among the projects undertaken in the region, Sibelco works in:
 - Recovery of degraded areas and planting trees, flora and fauna monitoring
 - Educational programs
 - Events with the local community
 - Plant visits
 - Financial or materials donations
 - Participation in advisory boards

Some Examples in South America

- Jaguaruna Plant - Brasil
 - Consistently contributed to the recovery of wildlife
 - Creation of a forest garden
 - Distribution of native seedlings in the community
 - Discovery of the archaeological site of Jaboticabeira V – (4000 years ago)
 - Certified by the Wildlife Habitat Council (WHC) NGO since 2007

Some Examples in South America

➤ Mogi das Cruzes – Sao Paulo, Brazil

- Open Doors Program

➤ Pedra do Indaiá – Minas Gerais, Brazil

- Lectures for young students about the recovery of PPA - Permanent Preservation Area

➤ Vertente do Lério – Brazil

- Donation of water from the quarry mine to be used in livestock of the region during the dry season, supplying the population for three months, in partnership with the Army, the Health Centre and the City Hall

Some Examples in South America

➤ Vermelho Novo – Brazil

- Recovery a degraded area of the old kaolin mine

➤ World Environment Day Campaign – South America

- Awareness and water, light and paper saving

Some Examples in South America

- Albardon and Los Berros – San Juan, Argentina
 - Lectures are held for the community and water distribution to the population in emergency situations.
 - During 2016, implementation of the Back to Life Program, starting with the request of the certification process by the WHC.

Some Examples in South America

- Noviciado – Lampa, Chile
 - State of the art project for quicklime lime and GCC
 - Coordination and open visits with local authorities
